

# CUSTOM CARTRIDGE, INC.

Precision Ultra High Performance Ammunition

## Brief Comparison of Hush™, SoftShot™ & Mimic™ Frangible Ammunition

Hush™	SoftShot™
Pistol calibers go through certain levels of soft body armor.	Pistol calibers do NOT go through soft body armor.
For sale to agencies ONLY.	For sale to civilians or individual officers.
Is offered in multiple velocities and fragmentation patterns per caliber, custom tuning available at no charge.	Is offered in one velocity and fragmentation pattern per caliber.
Is safe in extreme settings like schools, airplanes, power plants, oil facilities, ships, trains, or anywhere collateral damage is a major concern.	Is safe for general defensive use in your home or business and on the street.
Requires more extensive machining to specify fragmentation and penetration patterns.	Simplified machining, while retaining essential fragmentation.
Higher performance and custom tuning, worth the higher price.	Lower price alternative.
Heavier bullet weights in some calibers.	Lighter bullet weights in some calibers.
Training rounds (FP or TP) have same point of impact and recoil as HP, to provide less costly training option.	Training rounds (FP or TP) have same point of impact and recoil as HP to provide less costly training option and are ideal for indoor and outdoor steel target shooting. (Lead-free/non-toxic; greatly reduced ricochets and splash-backs.)
<p><b>Mimic™</b></p> <p>Customized middle price/performance alternative: close to Hush performance, close to SoftShot prices.</p>
