

**CUSTOM CARTRIDGE, INC.**

*Precision Ultra High Performance Ammunition*

## Hush™ Performance Level Use Guide

*general guide*      *The higher the number, the deeper the penetration and lower the fragmentation. The lower the number, the shallower the penetration and the more complete the fragmentation.*

- Level 5**      Match grade target competitions & training. No splash backs in steel plate training for maximum shooter safety. *(and...)*
- Maximum penetration for combat on soft to hard targets with minimal to no fragmentation; reduced hazard to bystanders.
- Level 4**      Controlled penetration for combat on soft to hard targets with little to no fragmentation; reduced hazard to bystanders.
- Level 3**      Reduced penetration for combat on soft to medium targets with some fragmentation; reduced hazard to bystanders.
- Level 2**      Moderate penetration and more fragmentation for combat on soft targets; enhanced bystander safety.
- Level 1**      Low penetration and hyper fragmentation for combat on soft targets; high bystander safety.
- Level 0**      Shallow penetration and partial disintegration for combat on soft targets; very high bystander safety.
- Level 00**      Shallow penetration and near complete disintegration for combat on soft targets; extremely high bystander safety.
